

Working capital in five questions — no documents to hand over.

Most Rwandan businesses run on cash, so we don't ask for statements to get started. Tell us five things about your business and Rozine shows what you qualify for in about a minute. Investors fund the loan; you repay monthly over 3–12 months and keep full ownership.

IT IS A LOAN, NOT A SHARE

WHY BUSINESSES USE ROZINE

Cash sales count here. You are judged on what the business actually earns, not on paperwork you don't keep.

You see it before you commit. Amount, term, monthly repayment and total cost, all on one screen.

An amount you can carry. The loan is sized so the repayment stays well below your monthly profit.

Every repayment builds a record. Pay on time and your rating rises, so the next loan is larger and cheaper.

HOW IT WORKS

01
Answer five questions

Name, revenue, costs, sector, year registered.

02
See your offer

Amount, rating, term and monthly repayment.

03
Figures confirmed

An Audit Partner verifies your numbers.

04
Funded, then repay

Investors fund it; you repay monthly.

THE NUMBERS WE SHOW YOU, EXPLAINED

NUMBER	WHAT IT MEANS FOR YOU	HOW IT IS WORKED OUT
Monthly profit	What is left over each month once costs are paid — the money that repays the loan.	$(\text{Revenue} - \text{costs}) \div 12$, from the figures you type in.
Rating 0–5	How lenders read your business. 4.0+ is Strong, 3.0+ Stable. A higher rating means a lower cost.	Years trading + sector + profit margin, scored 40–92 and shown out of 5.
Cover (DSCR)	Your safety margin. 1.25× means you earn 25% more than the repayment each month.	$\text{Monthly profit} \div \text{monthly repayment}$. We never size a loan below 1.25×.
Cost of the loan	What you pay on top, all in. 10–15% over the term — no hidden fees on top.	10% base, plus a premium for a weaker rating or a longer term. Capped at 15%.

WHAT HAPPENS TO YOUR INFORMATION

Nothing to upload

No statements, no bank login, no account needed to see your amount.

Estimates are fine

Your first answers only size an offer. Nothing is binding until you accept.

Investors see a rating

They see rating, sector and term — not your raw revenue and costs.

Encrypted end to end

Bank-grade encryption on your details and every transaction record.

A loan must be repaid. Figures you type are estimates only — the final amount, rate and term are set after an Audit Partner confirms your numbers, and are subject to approval.

Check your amount before launch.

Waitlisted businesses are funded first when Rozine opens.
