

Lend to profitable Rwandan businesses.

Earn a fixed 10–15% per note.

Rozine turns verified small-business loans into notes of RWF 5,000 each. Buy a single note or as many as you like. Each business borrows RWF 5M–50M against revenue confirmed from its bank and Mobile Money statements and co-signed by an ICPAR-accredited Audit Partner, then repays in fixed monthly instalments over 3 to 12 months. You choose which businesses to back, and you are paid every month.

RWF 5,000

ONE NOTE — THE MINIMUM

3–12 months

FIXED TERM, KNOWN UPFRONT

Monthly

REPAYMENTS, NOT ONE LUMP

WHY INVESTORS USE ROZINE

A return that beats a deposit. 10–15% total return over the note's term, set by the borrower's rating and term — not by us.

Spread small, not big. One note is RWF 5,000, so a single amount can sit across many businesses. No investor may hold more than 50% of a business's raise target — the rest stays open to everyone else.

You pick the risk. Every note shows its rating, sector, term, cover and return before you commit a franc.

An exit before maturity. List a note on the secondary market if you need your money back early. Rozine charges 2% on a matched trade.

HOW IT WORKS

01

Fund your account

By Mobile Money, bank or card.
No fee to invest or hold.

02

Buy into notes

Browse audited businesses and buy as many RWF 5,000 notes as you want.

03

Get paid monthly

Principal and return land in your account each month, with a verified update.

04

Reinvest or exit

Roll repayments into new notes, or sell a note early on the secondary market.

THE NUMBERS ON EVERY NOTE, EXPLAINED

METRIC	WHAT IT TELLS YOU	HOW IT IS WORKED OUT
Rating 0–5	How safe the business looks. 4.0+ is Strong, 3.0+ Stable, below 2.0 Distressed.	Years trading, sector, verified margin and repayment history, scored out of 5.
Return	What you earn if the note repays in full — a total over the term, not an annual rate.	10.5% floor, plus a premium for weaker ratings and longer terms. Capped at 15%.
Cover (DSCR)	How much room the business has to pay you. 1.25× means it earns 25% more than the instalment.	Monthly profit ÷ monthly instalment. No note is listed below 1.25×.
Note size	The total the business is raising, always between RWF 5M and RWF 50M.	Monthly profit at 1.25× cover, capped at 35% of verified annual revenue.

HOW YOUR MONEY IS HANDLED

Verified, then watched

An Audit Partner co-signs the figures before listing and re-verifies every month of the term.

Held separately

Investor funds sit in a segregated account, never mixed with Rozine's own money.

Priced by risk

A weaker rating cannot be dressed up — it raises the return and shrinks the note size.

Encrypted end to end

Bank-grade encryption on your details and every transaction record.

Lending carries risk: a business can repay late or fail, and past repayment does not guarantee future repayment. Rozine is a marketplace and does not guarantee any note. Returns are stated as a total over the note's term, not as an annual rate, and are shown before any loss. Nothing here is investment advice.

Start from RWF 5,000.
