

Lend to profitable Rwandan businesses. Earn 10–15% a year.

Rozine turns small-business loans into notes you can buy from RWF 5,000. Every business is scored on its own numbers, confirmed by an independent Audit Partner, and repays on a fixed 3–12 month schedule. You choose which businesses to back.

RWF 5,000

MINIMUM TO START

3–12 months

FIXED TERM, KNOWN UPFRONT

Monthly

REPAYMENTS, NOT ONE LUMP

WHY INVESTORS USE ROZINE

Yield that beats a savings account. 10–15% a year, set by the borrower's rating and term — not by us.

Spread small, not big. Small minimums mean one amount can sit across many businesses instead of one.

You pick the risk. Every note shows its rating, sector, term and yield before you commit a franc.

An exit before maturity. List a note on the secondary market if you need your money back early.

HOW IT WORKS

01
Set your amount

From RWF 5,000. No account fee.

02
Pick your notes

Rating, yield and term shown on each.

03
Get paid monthly

Principal and interest, on schedule.

04
Reinvest or exit

Roll into new notes or sell early.

THE NUMBERS ON EVERY NOTE, EXPLAINED

METRIC	WHAT IT TELLS YOU	HOW IT IS WORKED OUT
Rating 0–5	How safe the business looks. 4.0+ is Strong, 3.0+ Stable, below 2.0 Distressed.	Years trading + sector + profit margin, scored 40–92 and shown out of 5.
Yield	What you earn on the money if the note repays in full.	10% base, plus a premium for weaker ratings and longer terms. Capped at 15%.
Cover (DSCR)	How much room the business has to pay you. 1.25× means it earns 25% more than the payment.	Monthly profit ÷ monthly repayment. No note is issued below 1.25×.
Capacity	The most that business can borrow — the ceiling on the note size.	Sized off monthly profit at 1.25× cover, never more than 35% of annual revenue.

HOW YOUR MONEY IS HANDLED

Numbers confirmed

An independent Audit Partner checks a business's figures before its note is listed.

Held separately

Investor funds sit in a segregated account, never mixed with Rozine's own money.

Priced by risk

A weaker rating cannot be dressed up — it raises the yield and shrinks the capacity.

Encrypted end to end

Bank-grade encryption on your details and every transaction record.

Lending carries risk: a business can repay late or fail, and past repayment does not guarantee future repayment. Yields shown are before any loss. Nothing here is investment advice.

Reserve your spot before launch.

Waitlist investors are first in line when the first notes open.
